

GoSecure Safe, Xchange, Backup, Reader and Portal

Language: English

Version number: 1.3

Release Date: June 2008

Technologies including intrusion detection, firewalls, and VPN are focused on protecting infrastructure. Safe, Xchange, and Backup are solutions focused on **protecting the users' most meaningful asset: information or content.**

GoSecure solutions are designed to increase industry adoption rates for information security through technology innovation and improving end-user experience. **Industry leading information security, ease of use, deployment, and simple end-user experience** differentiates GoSecure Portal from others.

Download:  GoSecure Safe Trial Version and GoSecure Reader for free <http://gosecure.com>

Trial Version can be upgraded to the Full Version within the application.

Overview

- GoSecure allows its members secure storage, backup, sharing of information and networking with its suite of products and services: GoSecure Safe, Xchange, Backup, Reader and Portal,
- By offering integrated encryption, obfuscation as well as strong authentication, GoSecure provides a level of security that other networking sites alone cannot match - **all at a reasonable cost.**
- GoSecure's core technology is available in Portal and stand-alone Application and/or Enterprise Edition that provides a robust platform for the deployment and management of secure sharing and collaborating of critical and sensitive information.
- Key features include ease of use, information security and zero impact on work flow.

GoSecure Solutions

GoSecure Safe is a host-device information protection solution and is a cryptographic data vault for critical files. It protects files by encrypting and obfuscating. Access to the Safe application depends on type of authentication implemented.

GoSecure Safe application is available as a Trial or Full Version. The Trial Version is a limited version and is restricted to file protection of up to 50KB per file. Trial version can be upgraded to the Full Version from within the application at the cost of US \$9.95 per year.

GoSecure Xchange enables secure share or exchange of critical information via email - a critical end user security requirement. Leveraging GoSecure's core technology, the critical information is transformed into an innocent looking plausible cover. The plausible cover ensures that the protection stays with the critical information no matter where the information is sent or resides. GoSecure Xchange is easy to use application.

One click and the information is protected and obfuscated and is ready to be transferred securely. Xchange is a premium subscription based service. Xchange is priced at unlimited transactions per month for US \$9.95 or \$96 a year.

About GoSecure

Founded in 2007, GoSecure is based in Hyderabad, India. GoSecure underlying core technology is flexible, scalable and adaptable to support a broad portfolio of innovative current and future products and solutions.

The founders, a team of international renowned experts in their fields, have assembled a strong management team to build the business.

GoSecure is committed to developing innovative and easy to use, seamless end-point security solutions with zero incremental investment in infrastructure and zero change in workflow while maintaining user privacy. Our vision is based on a simple principle: robust, innovative products that are easy to use will lead to mass adoption.

GoSecure Solutions

Built on GoSecures' core technology, **GoSecure Backup** provides encrypted and obfuscated protection for online or offline **backup** critical information. One click and the content of GoSecure Safe is securely backed up. Once backed up, backup data is available to via **Cloud Computing** upon strong authentication. GoSecure Backups easy to use, install, deploy, manage and can be fully automated. Backup is premium subscription based service and is priced at US \$ 9.95 per month or US \$ 96 annually if paid upfront.

GoSecure Reader application allows you to **decode**, open and read the plausible covers received via email or any other digital methods. In addition to the reader one must enter Private Key to unlock the plausible cover. The management and distribution of Private Key is up to the end user.

GoSecure Portal enables members, at any time and at any place, the ability to **network** ensuring privacy and protection second to none. GoSecure Portal makes secure exchange and universal availability of critical information via **Xchange and Backup**. GoSecure Portal offers complete control of your Privacy. It is a secure, collaborative and advertisement free environment where members retain ownership of their information and can manage their privacy unlike any other networking portal.

Key Features

GoSecure Safe - Cryptographic Data Vault

- ❑ Digital Shredding, Encryption, and Obfuscation of Data
- ❑ No Compromise in Information Security After Boot Up
- ❑ Zero “Overhead” on Boot Up or Shut Down
- ❑ Maintains Full Master Folder and Sub-Folder Integrity
- ❑ Optional Biometrics Support
- ❑ Zero Non-Authorized Access to Information on Lost or Stolen Laptop

Single Click – File & Folder Protection

- ❑ File or Folder Level Protection
- ❑ Auto Protect Folder
- ❑ Right Click – “Protect”
- ❑ Proprietary File Management
- ❑ Secure “Vault” Storage
- ❑ Simple, Functional End-User Experience
- ❑ Disk management has no effect on protected assets

GoSecure Xchange - Trusted & Non-Trusted Secure Sharing

- ❑ Secure Collaboration Tool for Work Teams
- ❑ “Vault” – Laptop or Network
- ❑ Secure Enterprise Sharing & Collaboration
- ❑ Encryption and Obfuscation
- ❑ Secures Client Data and Company Data During Transition

GoSecure Backup and Restore - Full Time Laptop Protection

- ❑ Innovative Utility with Single Click Functionality
- ❑ Zero Compromise on Security (Enterprise Backup Server)
- ❑ Fast and Simple Data Restore Process
- ❑ Higher End-User Adoption & Utilization
- ❑ Secure and Plausible Backup on Enterprise Server or on Public Sites Such as Yahoo, MSN, or Google

GoSecure Solutions Summary

- ❑ Transparent Endpoint Security Solutions
- ❑ Innovative Secure Sharing & Collaboration
- ❑ Secure Archival and Storage of Enterprise Data
- ❑ Simple, Functional End-User Experience
- ❑ Authentication Not Identification
- ❑ Authentication Agnostic
- ❑ No Change in Workflow
